conveyor system

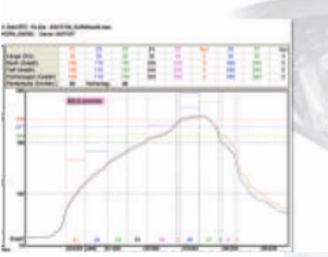

GoREFLOW-PLUS With a 'Plus' of Extra Performance

up-to-date control
concept and PC

perfect reflow
soldering results

powerful performance compact machine

- 2.7 m heated length, 8 zones, programmable fan speed and homogeneous energy transfer: the PLUS in flexibility
- 2 zones with active cooling: the PLUS in process safety
- up-to-date control concept with PC and connection to different interfaces: the PLUS for future applications
- reliable conveyor concepts with programmable, automatic width adjustment: the PLUS in convenience
- perfect reflow results, with or without nitrogen
- low costs of ownership, minimum maintenance and maximum machine availability
